SEASONAL AVAILABILITY

The Queenstown and Central Otago region does not have access to local commercial flower markets, so we must source the majority of our floral product from growers and markets throughout New Zealand and have these freighted down to us. We are fortunate to have longstanding relationships with many local gardens and growers, which offer us a variety of beautiful, locally sourced, wild flowers and foliage to supplement our commercially grown product. The selection varies month to month and is subject to availability, so a certain amount of flexibility when ordering your wedding flowers is required.

Whilst we endeavor to source your exact floral varieties, in some instances we are unable to do so. In this case, we will use our best judgment to find a suitable substitution and will inform you accordingly.

Seasonal availability of floral product can vary each year – this document is meant as a guide only, and is not a comprehensive or definitive list.

SUMMER BLOOMS

December - February
